SUMMARY

Business Intelligence Analyst with 4+ years of experience in BI reporting, SQL-based analysis, and stakeholder-facing dashboards, functioning as sole analytics owner across multi-property operations.

SKILLS

AI & Automation: AI/LLM Integration (GPT, Claude, Gemini), N8N Workflow Automation, REST APIs

Data & Analysis: Python (pandas), SQL, MySQL (CTEs, window functions), Power BI, Tableau, Power Query, Advanced Excel

CRM & Integrations: Salesforce, HubSpot, Cross-System Data Structuring

Communication: Cross-Functional Stakeholder Communication, Technical Translation & Presentation, Public Speaking

Certifications: Microsoft Power BI Data Analyst (PL-300); PMI-PMP (In Progress)

PROFESSIONAL EXPERIENCE

Business Social Media Analyst - Jamsan Management, Lexington, MA

May 2024 – Present

- Designed the data architecture for **Jamsan Social Hub(JSH)**, an internal analytics platform, defining schema to structure and store multi-format data (JSON metadata, image/video assets) and engagement metrics (views, likes, reposts, visitors) across 270+ social handles.
- Gathered analytics requirements from 5 stakeholders (leadership, marketing, property, IT) to define the KPIs and reporting structure the platform needed to support.
- Designed executive Power BI dashboards (revenue, occupancy, engagement KPIs) across 20+ hotel properties as sole analytics owner for Ops, Finance, and Marketing.
- Applied SQL-based analysis to large transactional datasets to optimize reporting pipelines, reducing processing time 30%.
- Built a financial forecasting model (Power Pivot) projecting \$1.15M in annual revenue vs. commission fees, informing a budget decision that avoided \$30K+ in costs.
- Designed and ran A/B tests (post formats, AI-generated vs. original video, pricing) across 3 hotels; the winning variant sold out a partner waterpark for 4 consecutive days.

Business Analyst - American Technological Consulting, Boston, MA

Jul 2023 – May 2024

- Queried and validated 15+ legacy SQL datasets spanning 25 years of transaction history, translating raw technical output into decision-ready insights for leadership
- Partnered with cross-functional teams to convert ambiguous business questions into structured technical requirements and analyses
- Documented technical validation and QA processes so non-technical stakeholders could trust and act on the outputs
- Communicated directly with stakeholders to clarify data points and resolve discrepancies within tight deadlines

Operations Analyst (Student Assistant) at University of Massachusetts, Boston, MA

Jan 2022 – May 2023

- Managed and analyzed 2,000+ work orders in the TMA ERP system for the Utilities Department, covering construction, maintenance, and HVAC mechanical projects, to support budget tracking and prioritization.
- Built an Excel-based analytical model examining 60 years of university capital spending to identify which buildings to prioritize for renovation based on historical renovation cycles, reducing manual research time by 30%.
- Designed and automated an ETL pipeline in Power Query for the A/V Department's equipment inventory database (TVs, projectors, screens, speakers, mics, recorders), flagging assets needing service, replacement, or disposal.
- Built a Power Pivot budget model to track A/V equipment condition and lifecycle, flagging repairable assets before replacement instead of premature disposal reducing department equipment spend by 30%.

Lead Generation Executive - Uplers Solutions Pvt Ltd, San Diego, CA

Jan 2020 – Apr 2021

- Reached out to 80-100 prospects daily across digital marketing (SEO, SEM, PPC, link building, and web design/development services, analyzing engagement and response patterns to prioritize high-intent prospects
- Built and maintained a structured lead pipeline, segmenting 80-100 daily contacts into potential, non-potential, and future-potential categories based on qualification data
- Analyzed conversion trends across lead segments to hand off sales-ready leads to sales managers, contributing to 20+ new business wins during peak COVID-19 market conditions
- Recognized as Best Employee of the Year for combining consistent lead qualification with data-driven prioritization of outreach
- Tracked future-potential leads on a recurring cadence, using historical response data to time re-engagement and convert cold prospects into pipeline opportunities

PROJECTS

Hotel Booking Demand Analysis | Python, MySQL, Tableau

- Cleaned 119,390 hotel booking records to 86,637 analysis-ready rows using Python (pandas), then wrote MySQL queries (CTEs, window functions) to analyze cancellations, revenue channels, seasonality, and source markets
- Found Online Travel Agent bookings cancel at 35.5% versus 14.9% for Direct, and built a Tableau dashboard with marketing recommendations such as deposits and direct-booking incentives

Meta Ad Performance Analytics Dashboard | Power BI

- Built a Power BI dashboard analyzing 216K impressions, 25.4K clicks, and 1.3K conversions, translating raw campaign data into a business-ready recommendation on budget reallocation

EDUCATION

Master of Science, Business Analytics - University of Massachusetts, Boston

Sept 2021 – May 2023

Statistics, Business Intelligence, Big Data Analytics, Data Warehousing, Machine Learning, Project management, Data Mining Management, Operations and Risk Analysis, Database Management System

Bachelor of Engineering, Computer Engineering - Gujarat Technological University, India

May 2015 – Jun 2019

ACHIEVEMENTS

- AWARDED** Employee of the Year at Uplers Solutions: top-ranked new business acquisition during peak COVID-19 conditions
- Speaker**, Northeastern University: addressed 50+ students on career paths and how AI is reshaping analytics work
- Speaker**, Re-defined Community: shared perspective on AI's impact on the data profession
