SKILLS

AI & Automation: AI/LLM Integration (GPT, Claude, Gemini), N8N Workflow Automation, REST APIs, Agentic Workflow Design

Data & Analysis: Python (NumPy, Pandas), SQL (Window Functions, CTE), Power BI, Tableau, PowerApps, Excel, QuickSight, DAX Studio, SAS, VBA

Database Management: SQL Server, Oracle, Microsoft Azure, AWS, MySQL, GCP, Hadoop, Spark, Talend

Project Management: JIRA, AGILE Methodology, Trello, A/B Testing, GitHub, SharePoint

Certifications: Microsoft Power BI Data Analyst (PL-300); PMI-PMP (In Progress), AWS Cloud Practitioner

PROFESSIONAL EXPERIENCE

Business Social Media Analyst

Lexington - Massachusetts

Jamsan Management

May 2024 - Present

- Own end-to-end delivery of **Jamsan Social Hub** (internal marketing platform), gathering requirements from **5 stakeholders** and defining specs and data architecture to manage **270+ social handles**, built integrations, that projected to cut manual content workload by **70%**.
- Conduct structured stakeholder interviews with marketing leadership and end users to elicit, document, and validate functional requirements for content storage, generation, and analytics workflows.
- Translate business requirements into technical specifications and data models, defining the schema to store multi-format content (JSON metadata, PNG/MP4 assets) and engagement metrics (views, likes, reposts, visitors).
- Designed executive Power BI dashboards (revenue, occupancy, engagement KPIs) across 20+ hotel properties as sole analytics owner for Ops, finance and marketing
- Optimized complex SQL queries on large transactional datasets, cutting recurring reporting time by 30%
- Built a Power Pivot cost benefit model forecasting \$1.5M in annual revenue vs commission fees, avoiding \$30K+ in costs.
- Ran A/B tests (post formats, AI vs. original video, pricing) across 3 hotels; winning promo sold out a partner waterpark for 4 straight days.

Business Analyst

Boston, Massachusetts

American Technological Consulting, Boston, MA

Jul 2023 - May 2024

- Queried and validated 15+ legacy SQL datasets spanning 25 years of transaction history, translating raw technical output into decision-ready insights for leadership
- Partnered with cross-functional teams to convert ambiguous business questions into structured technical requirements and analyses
- Documented technical validation and QA processes so non-technical stakeholders could act on the outputs that saved 50% of their research work.
- Communicated directly with stakeholders to clarify data points and resolve discrepancies within tight deadlines

Operations Analyst, Co-Op

Boston, Massachusetts

University of Massachusetts, Boston, MA

Jan 2022 - May 2023

- Managed and analyzed 2,000+ work orders in the TMA ERP system for the Utilities Department, covering construction, maintenance, and HVAC mechanical projects, to support budget tracking and prioritization.
- Built an Excel-based analytical model examining 60 years of university capital spending to identify which buildings to prioritize for renovation based on historical renovation cycles, reducing manual research time by 30%.
- Built a Power Pivot budget model to track A/V equipment condition and lifecycle, flagging repairable assets before replacement instead of premature disposal reducing department equipment spend by 30%.

Lead Generation Executive

San Diego, CA | Ahmedabad - INDIA

Uplers Solutions Pvt Ltd

Jan 2020 - Apr 2021

- Reached out to 80-100 prospects daily across digital marketing (SEO, SEM, PPC, link building, and web design/development services, analyzing engagement and response patterns to prioritize high-intent prospects
- Built a structured lead pipeline, segmenting 80-100 daily contacts into potential, non-potential, and future-potential categories based on data
- Analyzed conversion trends across lead segments to hand off sales-ready leads to sales managers, contributing to 20+ new business wins during peak COVID-19 market conditions
- Tracked future-potential leads on a recurring cadence, using historical response data to time re-engagement and convert cold prospects into pipeline opportunities

Projects

Meta Ad Performance Analytics Dashboard | Power BI | MS Advanced Excel | DAX | [GitHub](#)

- Built a Power BI dashboard from scratch analyzing 216K impressions, 25.4K clicks, and 1.3K conversions, calculating CTR and conversion rate metrics to identify performance drivers
- Segmented audience and format-level performance data to surface actionable, data-backed recommendations, demonstrating end-to-end dashboard ownership from requirements to delivery

Hotel Booking Demand Analysis | Python(NumPy, Pandas) | Jupyter | MySQL | Tableau | [GitHub](#)

- Cleaned 119,390 hotel booking records to 86,637 analysis-ready rows using Python (pandas), then wrote MySQL queries (CTEs, window functions) to analyze cancellations, revenue channels, seasonality, and source markets
- Found Online Travel Agent bookings cancel at 35.5% versus 14.9% for Direct, and built a Tableau dashboard with marketing recommendations such as deposits and direct-booking incentives

Bank Customer Credit Card Classification | Data Mining | R-Programming | [GitHub](#)

- Performed exploratory data analysis and outlier detection on 5,000 customer records across 13 variables, then tested for heteroscedasticity (Breusch-Pagan test) and applied HC1 robust standard errors to ensure valid statistical inference
- Built and evaluated a logistic regression model predicting credit card ownership, training on 3,000 records and validating on 2,000, achieving 71% classification accuracy via confusion matrix analysis

EDUCATION

MS in Business Analytics at University of Massachusetts, Boston

Sept 2021 – May 2023

Coursework: [R-programming](#), [Data Mining](#), [Data Analysis](#), Data Warehousing, Supply Chain, [Business Intelligence](#), Project Operations Management, DBMS

Bachelor of Engineering, Computer Engineering at Gujarat Technological University - INDIA

May 2015 – Jun 2019

Coursework: Computer programming (Python, Java, C), Computer Networks, Operating System, AIML, Data Structure, DBMS, RDBMS
