

YASH RAMAKANT MISHRA

Business Data Analyst

Boston, MA | 706-765-5401 | yrmishra1904@gmail.com | linkedin.com/in/yrmishra | github.com/YRMishra19 | yrmishra.com

SKILLS

Data & Analysis: Python (Pandas, NumPy), SQL (CTEs, Window Functions), R, SAS, Excel (Power Pivot, VBA), Power BI (DAX), Tableau, QuickSight, PowerApps, DAX Studio

Databases & Cloud: Snowflake, SQL Server, MySQL, Oracle, AWS, Microsoft Azure, GCP

AI & Automation: AI/LLM Integration (GPT, Claude, Gemini), n8n Workflow Automation, REST APIs, Agentic Workflow Design

Methods & Tools: Data Modeling, ETL, A/B Testing, Requirements Gathering, JIRA, Agile, Trello, GitHub, SharePoint, HubSpot

Certifications: Microsoft Power BI Data Analyst (PL-300), AWS Cloud Practitioner, PMI-PMP (In Progress)

PROFESSIONAL EXPERIENCE

Business Social Media Analyst

Lexington, MA

Jamsan Hotel Management Inc.

May 2024 - Present

- Saved **\$30K/year** by modeling OTA commission vs. annual-fee costs on **\$1.5M** in hotel revenue (MS Excel), guiding leadership's spending decision.
- Cut recurring reporting time by **30%** and gave **4** stakeholder groups (GMs, sales, accounting, regional managers) one view of revenue, occupancy and engagement across 20+ hotels by building executive Power BI dashboards with standardized KPIs on optimized **Snowflake SQL** queries.
- Owned end-to-end delivery of an in-house AI marketing platform for **270+** social handles, turning lead and reach goals from **5** stakeholders into functional specs and designing the data architecture and **REST API** integrations (**n8n, LLMs**) for AI content generation, data storage and analytics dashboards. The platform replaced outsourced agencies, cut agency spend by **\$65K** and reduced manual workload by **50%**.
- Designed a **Snowflake SQL** and **JSON** data model centralizing content assets and engagement metrics (views, likes, reposts, visitors) across **270+** digital account handles, giving leadership a single source of truth for marketing performance.

Business Analyst

Boston, MA

American Technological Consulting

Jul 2023 - May 2024

- Improved data integrity for a banking client by auditing **15+** legacy **Databricks SQL** datasets (**900K rows total**) against raw source records, identifying and removing **252K** duplicate rows (**28%**) along with empty and mismatched records using Databricks SQL and **Python (Pandas)**.
- Built an end-to-end clean, transform and load workflow across **25** years of transaction history, feeding validated data into Tableau dashboards with calculated KPIs that stakeholders used to reconcile transaction totals.
- Cut stakeholder research time by **60%** by replacing manual analysis with **Tableau** dashboards and **Excel pivot** summaries, so teams moved straight from data to decisions.

Operations Analyst, Co-Op

Boston, MA

University of Massachusetts Boston

Jan 2022 - May 2023

- Saved leadership 50% of review time by analyzing **2,000+ TMA ERP** work orders with **Excel (VBA)** and **Power BI (DAX)**, identifying overspend and aging HVAC systems for replacement.
- Engineered a Python (**Pandas, NumPy**) and **Excel VBA** pipeline analyzing **60** years of capital spending and renovation cycles to rank buildings for renovation, cutting manual research time by **50%**.
- Cut the university A/V department's equipment spend by an average of **32.5%** by building an Excel Power Pivot model with DAX measures that tracked audio-video equipment condition and lifecycle, flagging repairable assets before premature replacement.

CRM Analyst

Ahmedabad, India

Uplers Solutions Pvt. Ltd.

Jan 2020 - Apr 2021

- Sped up lead hand-offs to sales by **40%** by designing a **HubSpot** pipeline with automated workflows and segmentation rules that sorted **80 – 100** daily contacts into positive, negative, undecided and future-prospect stages, so sales teams spent their time on qualified leads, not on manual sorting.
- Contributed to **20+** new business wins during peak COVID-19 by analyzing response patterns and **A/B**-tested email messaging across **5,000+** HubSpot records, then using HubSpot dashboards to show sales managers which lead segments and messages performed best across the USA and Australia.
- Reactivated cold prospects into pipeline opportunities by tracking future-prospect leads on a recurring cadence and using historical response data to time re-engagement.

PROJECTS

Meta Ad Performance Analytics Dashboard | Power BI, Advanced Excel, DAX | GitHub

- Built a Power BI dashboard from scratch analyzing **216K** impressions, **25.4K** clicks and **1.3K** conversions, calculating CTR and conversion rate metrics to identify performance drivers.
- Segmented audience and format-level performance data to surface actionable, data-backed recommendations, demonstrating end-to-end dashboard ownership from requirements to delivery.

Hotel Booking Demand Analysis | Python (Pandas, NumPy), Jupyter, MySQL, Tableau | GitHub

- Cleaned **119,390** hotel booking records to **86,637** analysis-ready rows using **Python (Pandas, NumPy)**, then wrote **MySQL** queries (**CTEs, window functions**) to analyze cancellations, revenue channels, seasonality and source markets.
- Found Online Travel Agent bookings cancel at **35.5%** versus **14.9%** for Direct, and built a Tableau dashboard with marketing recommendations such as deposits and direct-booking incentives.

Bank Customer Credit Card Classification | R, Data Mining | GitHub

- Performed exploratory data analysis and outlier detection on **5,000** customer records across **13 variables**, then tested for **heteroscedasticity (Breusch-Pagan test)** and applied HC1 robust standard errors to ensure valid statistical inference.
- Built and evaluated a logistic regression model predicting credit card ownership, training on **3,000** records and validating on **2,000**, achieving **71%** classification accuracy via confusion matrix analysis.

EDUCATION

M.S. Business Analytics, University of Massachusetts Boston

Sep 2021 - May 2023

Coursework: R Programming, Data Mining, Data Analysis, Data Warehousing, Supply Chain, Business Intelligence, DBMS, Risk Analysis, Project Management

B.E. Computer Engineering, Gujarat Technological University, India

May 2015 - Jun 2019
